MIS reports designed to cover areas of fund management for quick decision making. Reports can be viewed on-screen, printed and saved. Graphical Periodic reports are also available.

■ **Security**

With advanced technologies and proven backend infrastructure, data and application remains highly secured.
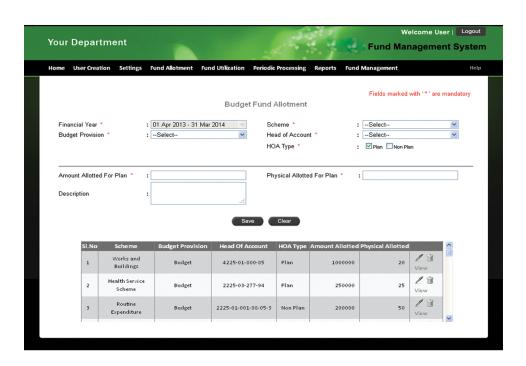

■ **Customer Support**

Our dedicated team of Fund Management experts will provide individual attention to clients and provides technical and customer support ensuring availability 24x7.

OUR FEATURES

FMS provides a complete range of functionalities to manage all the plan and non-plan funds i.e. budgetary provision, allotment, utilization and appropriation of all the schemes under the department. It covers the entire financial process administration functionality across the core and strategic areas of Fund Management. By implementing SFMS, departments can improve their administrative responsiveness and efficiency which aids better planning and decision making.

FMS is a web-based application which shall be accessed from anywhere through the internet. This allows users to work after office hours and from home. The functionalities are tightly integrated through a workflow. The Process flow incorporated in SFMS is derived from best practices adopted at various Government departments after conducting Government Process Re-Engineering (GPR) in such departments.

KEY MODULES

Module	Description
Allotment	It allows allotment of funds i.e. both financial and physical at various hierarchy of offices within the department.
Utilization	It allows to process monthly utilization details.
